

# Our Unique Medical Compressors System

## Model Matrix CIMVWA

## We Take a Systems Approach to Your Compressed Air Management Needs

Champion understands that your medical facility's oil-less compressor is part of a more comprehensive air management system. That's why we supply complete air compressor packages that can include air dryers, specialized filter banks, dewpoint/CO monitor, and complete controls.

Our approach to medical compressor system design is unique. Rather than offering a single, large system, we offer smaller, multiple-compressor units connected to a single air receiver. This energy-saving design means that you have maximum air delivery only when you need it. You have the flexibility of single unit operation alternating between compressors or multiple-compressor operation, depending on air demand.

This redundant design assures that you always have a reliable source of compressed air and the small footprint of our oil-less packages saves valuable floor space and allows for easy installation.
